REPORT INFORMATION

Transaction Type	Asset Backed Security Programme	
Reporting period	Start	Monday, 01 September, 2025
Days in period	End	Sunday, 30 November, 2025
Issuance date		90
Determination date		Wednesday, 26 May, 2021
Payment Date		Sunday, 30 November, 2025
Type of Assets		Monday, 22 December, 2025
Initial Number of Assets		Instalment Sales Agreements - Vehicle Finance
Initial Participating Asset Balance		2 054
Initial debt balance		999 483 149
Tap period	Start	1 000 000 000
Priority of Payments Type	End	Wednesday, 26 May, 2021
		Tuesday, 20 December, 2022
		Pre-enforcement

HEDGE INFORMATION

Hedge Counterparty	The Standard Bank of South Africa Limited
Credit rating of hedge counterparty	Aa1.2a/P-1.2a
Type of hedge provided	Fixed for floating; Prime/JIBAR basis swap

LIQUIDITY FACILITY

Liquidity Facility Provider	The Standard Bank of South Africa Limited
Credit rating of liquidity facility provider	Aa1.2a/P-1.2a
Initial Facility Size as at Initial Issue date	38 850 000
Facility Size for Next Quarter	29 308 511
Facility Purpose	The Liquidity Facility shall be used by the Issuer for the sole purpose of funding Liquidity Shortfalls

Class B	TRA5B1	150	150	Floating (3M JIBAR)	Principal Lock-Outs will apply for as long as the ratio of aggregate outstanding principal of the Class B Notes relative to the outstanding principal of all Notes is less than 3 times the same ratio at the most recent Issue Date or if there is a Principal Deficiency.
	TRA5B2	87	87		Interest on the Class B Notes is deferrable if the quantum of the outstanding Principal Deficiency exceeds 5% of the Class B Notes and the Class C Notes.
	Total	237	237		
Class C	TRA5C1	60	60	Floating (3M JIBAR)	Principal Lock-Outs will apply for as long as there are Class B Notes outstanding.
	TRA5C2	35	35		Interest on the Class C Notes is deferrable if there is a Principal Deficiency.
	Total	95	95		

Overview of modelling approach

Model architecture – cash flow overview

Cash flow diagram

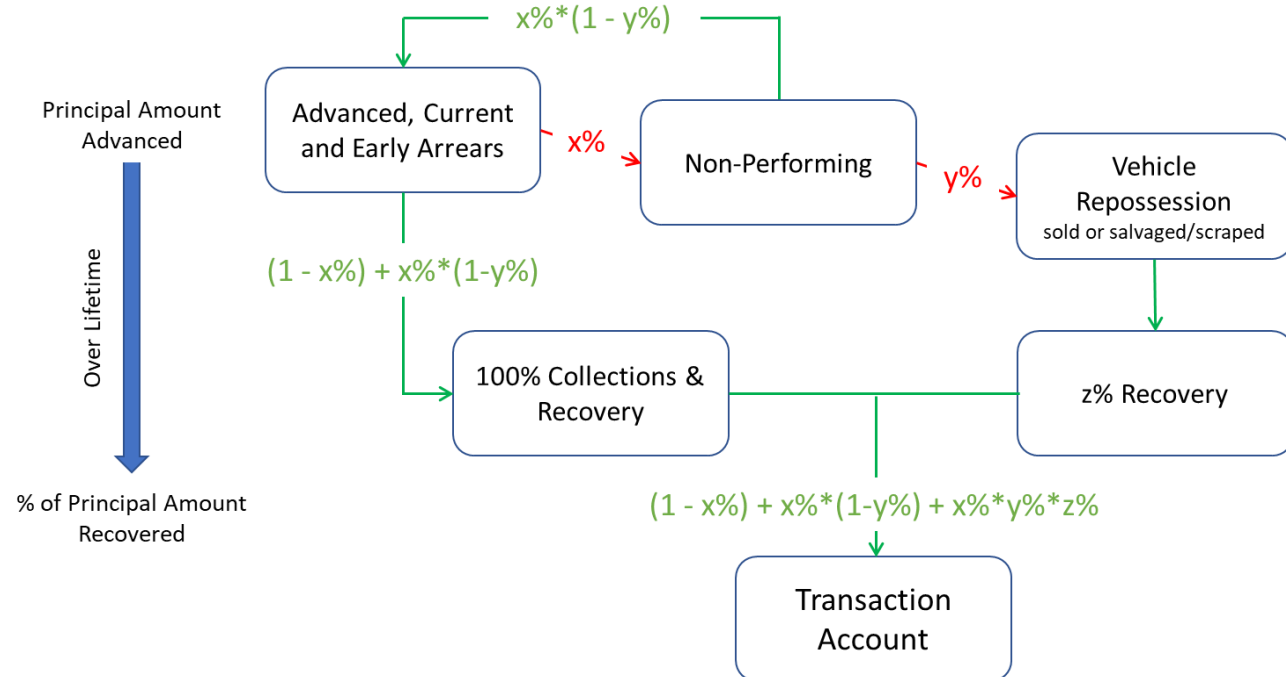

Cash flow steps

- 1 SA Taxi continues to service the instalment sale agreements ("ISA") that are owned by the respective Issuers, in accordance with the respective Servicing Agreements. The services include ensuring that the collection activity is performed on the Issuers' portfolio.
- 2 Cash flows from the ISA portfolios are in the form of instalment receipts (cartrack, insurance, interest and principal receipts), principal prepayments and recoveries from repossessions. These cash flows are aggregated within each quarter across multiple sub-portfolios.
- 3 The aggregated quarterly cash flows are applied in the sequence of the respective Priority of Payments*, which also considers the availability of the Liquidity Facilities.
- 4 The quarterly obligations of the Notes are serviced to the extent permissible by the cash flows derived from the Priority of Payments*.

* See Annexure 1 for summary of Priority of Payments

Model architecture – asset lifecycle

- The asset cash flows are modelled over a timeseries to generate an approximate profile of the Issuers' cash receipts that captures the inherent variability of such amounts over time.
- This is typically done from the start of the transaction, taking into account (amongst other things):
 - seasonality of the portfolio at inception;
 - the potential for parts of the portfolio to become delinquent; and
 - A portion of the delinquent ISAs is going through a security realisation process.

- Transsec 5 is a closed static structure with a ring-fenced portfolio that has already partially paid down, has migrated and continues to move between the stages of the asset lifecycle.
- The modelling of Transsec 5 at this more mature stage of the transaction must recognise the current portfolio composition and the possibility of further migration.

Model architecture – asset categorisation

Category 1

Advanced, Current and Early Arrears

- Represent arrears less than 90 days - “**performing**”, implying that cash flow is continuing
- Modelled through representative sub-portfolios
- Model settings impacting this cash generation include (amongst others):
 - ✓ The seasoning of the assets (extracted from the portfolio data)
 - ✓ The margin of the portfolio (extracted from the portfolio data)
 - ✓ The impact of prepayments and delinquent loans on the margin (margin compression)
 - ✓ Base rate movements
 - ✓ The remaining tenors of the ISAs
 - ✓ Prepayments
 - ✓ Early arrears
 - ✓ ISAs becoming non-performing, following which some will cure back into performing and the balance repossessed
 - ✓ Recoveries (rate and timing) on repossessions

Category 2

Non-Performing (excl. repo)

- Represents arrears 90 days or more – “**non-performing**”, implying that cash flow is disrupted
- This category 2 is further segmented based on the **months since first date of default**
- **2a: 20 or less months since first date of default.**
Modelled through representative sub-portfolios with no immediate cash flow until:
 - ✓ a portion of these vehicles cure back to performing over time (see category 1 settings); and
 - ✓ the remaining portion is repossessed and sold or salvaged/scrapped
- **2b: more than 20 months since the first date of default.**
Modelled at an individual ISA level, assuming all the vehicles will go into repossession with no intermediate cash flow until the vehicle is sold or salvaged/scrapped.
- The category 2b Net Realisable Values (“NRV”) is extracted from SA Taxi’s data and based on the average estimated NRVs for the repossessed vehicles segmented by the Taxi’s model year. These NRV estimates are mapped against the model year of the accounts/vehicles flagged as 2b

Category 3

Repossessed Vehicles

- Represents ISAs that are either classified as in the process of being repossessed, repossessed or as stock – “**repossessed vehicles**”
- Modelled at an individual ISA level, assuming no intermediate cash flow until the vehicle is sold or salvaged/scrapped.
- The Category 3 NRV is based on the estimates provided by SA Taxi, which factors in the selling price and estimated repair costs.

Transsec 5 asset breakdown

Key points:

- The tables breakdown the key settings for Category 1 and Category 2a and are derived from the portfolio data as at **30 August 2025**
- Month on Book (“**MOB**”) refers to the years passed since origination (i.e. seasoning) up until the latest Transsec 5 investor report date of **30 August 2025**
- Category 1 and Category 2.a ISAs are modelled as representative sub-portfolios, split by MOB with the respective settings in each column
- Seasoning determines 1) the rate of monthly principal instalment collections, in addition to 2), in respect of Category 1, the extent to which further non-performing loans may emerge from each respective MOB sub-portfolio
- Category 2.b and Category 3 are modelled at an individual ISA level

Category 1

Scenario analysis

mobalyz

Notes loss % determination and key isa settings

Note Loss % Formula

$$\text{Note Loss \%} = \frac{A-B}{A}$$

- ✓ **A - Exposure:** The total nominal amount outstanding as at the last IPD for each class of notes
- ✓ **B - Receipts:** The present value of the interest and principal cash flows received for each respective class of note, per the PoP.

Category 1

Category 2.a

Category 2.b

Category 3

Key Settings	Description
Interest Rate	Rates are assumed to be flat and are based on the Prime/Jibar rates at the time of the pool cut-off.
Prepayments	Prepayment Rate is expected to remain low at 2.5%, given the historic prepayment data.
Repossession Rate	A 75% repossession rate on non-performing ISAs based on historical experience
Default Vector	Evolution on non-performing ISA's consistent with historical experience
Recovery Periods	Base recovery workout period is assumed to be 20 months, however, is adjusted downwards based on the number of months in default i.e., assumes a shorted dated workout for longer dated defaults.
Margin Compression	Margin compression accounts for a lower yield on the portfolio of assets, based on prepayments, repossessions and a general repayment rate in the portfolio

Scenario 1: base scenario recoveries on repossessed vehicles/stock (Cat 2.b and 3)

- No haircut applied to NRV of stock and repo vehicles, thus assuming that the NRV as prescribed will be recovered.

SCENARIO 1

Scenario 1	STOCK		REPO	
	2016 and before	2017 and after	2016 and before	2017 and after
Haircut	0%	0%	0%	0%

Scenario analysis – interpreting the results

Interpreting the Note Loss % Scenario Outcomes

The Note Loss % scenario analysis on the following slide illustrates:

- a range of Note Loss % outcomes with the Category 1 and 2.a settings held constant and two variable key inputs; with
- The Scenario 1 and 2 for Category 2.b and 3 are overlaid

Principal Recovery Rate % Setting:

- Applicable to Categories 1 and 2a
- The upper bound **70%** of the recoveries based on the upper end of weighted average extrapolated principal recoveries of SA Taxi's historical performance data for the period 2009 to 2023.
- The lower bound **20%** was based on the recovery largely a factor of what could be salvaged / scrapped once repossessed.

Cumulative Max Default % Setting:

- The weighted average extrapolated default % for the Transsec 5 portfolio is +-50%, based on data for the period 2009 to 2023, across both new and pre-owned vehicles
- the range for the cumulative max default % of **48% to 54%**, derived based on the extrapolated defaults across the new and pre-owned vehicles historic data weighted against the portfolio exposure to each vehicle type

Class [A,B,C] Note Loss %		Principal Recovery Rate %					
		70%	60%	50%	40%	30%	20%
Cumulative Max Default %	48.0%						
	49.0%						
	50.0%						
	51.0%						
	52.0%						
	53.0%						
	54.0%						

Note Loss % for the combination of 51% cumulative default % and ISA Principal Recovery Rate of 50%

Key factors impacting portfolio performance

Transsec 5 | Risk grade

Macro Overview

- Portfolio originated during the **COVID-19** period **across all risk grades** (1-10), with ~47% in risk grade 7 or lower. (Currently only grades 9 and 10 are being originated.)
- Originations occurred at the **bottom of the interest rate cycle**; shortly thereafter **rates increased by ~50%** (Aug-21 to Nov-22).
- Average **fuel prices rose by ~43%** over the same period (Aug-21 to Nov-22).
- High sector-wide origination volumes led to an **oversupply of operators**, while **demand declined** due to lockdowns and hybrid working.
- Combined with **no fare increases**, **operator profitability deteriorated materially or completely disappeared**.

Transsec 5 | Origination period vs Interest rate

Transsec 5 | Origination period vs Fuel price

Note repayment and portfolio movement

Initial capital vs. Capital outstanding per class

Initial total capital vs. outstanding total capital (excl. subordinated debt)

Seasoning and migration of the underlying asset portfolio

Dec 2025 | Scenario analysis – Transsec 5

Scenario 1: Base Scenario with no Haircuts

Class A Note Loss %		Principal Recovery Rate %					
		70%	60%	50%	40%	30%	20%

MODEL DISCLAIMER

This cash flow analysis (“Model”) was prepared by The Standard Bank of South Africa Limited (“Standard Bank”) at the request of SA Taxi Development Finance Pty Ltd (the “Company”) for the purpose of assisting the Company in evaluating, on a preliminary basis, the scenarios under which the obligations of the notes issued by Transsec 5 may be serviced (“Permitted Purpose”). This Model is proprietary to Standard Bank.

By accepting the Model, the Company and any other recipient (the Company in its capacity as a recipient and any other recipient together and individually hereinafter being referred to as a “Recipient”) agrees to be bound by the limitations and principles provided for in this disclaimer. If required to do so, the Company and or the Recipient shall promptly return or destroy this Model, and any copies thereof, including any copy held in electronic form.

This Model is for reference purposes only and is provided strictly on a non-reliance basis. By accepting this Model, the Company and the Recipient each agree to adhere to all confidentiality obligations applicable to the Company and Recipient, and furthermore to use the contents of this Model in a confidential manner and for the Permitted Purpose only, and in accordance with its compliance policies, contractual obligations and all applicable laws and regulations, including but not limited to applicable securities laws and financial crime legislation. Standard Bank shall have no liability for any non-compliance by the recipient of any applicable laws or regulations in any jurisdiction.

As Standard Bank is not acting on behalf of the Recipient of this Model (other than the Company), receipt by such other Recipient of this Model and any other confidential information shall not be construed as constituting such Recipient as a customer of Standard Bank, and accordingly Standard Bank shall not be responsible to such Recipient for providing any protections afforded to its customers.

This Model should not be considered investment advice or any form of recommendation. Standard Bank’s views may be based upon a number of factors including, but not limited to, current or recent market transaction prices for comparable instruments, market liquidity, proprietary models and assumptions, and/or publicly available information. Actual results may vary materially and adversely from projected results and information contained herein. Standard Bank’s opinions and estimates constitute Standard Bank’s judgment and should be regarded as preliminary and for illustrative purposes only. In preparing this Model, Standard Bank and its affiliates (the “Group”) have relied upon and assumed, without independent verification, the accuracy and completeness of all information available from public sources or which was provided to Standard Bank by or on behalf of the Company or which was otherwise reviewed by Standard Bank. In addition, other than as set out above, our analyses are not and do not purport to be appraisals of the assets, stock, or business of any entity. No representation or warranty (whether express or implied) is made by Standard Bank in respect of the accuracy, sufficiency or completeness of the Model or any information contained in the Model, or in any other written or oral communications transmitted to the Company.

This Model is not an offer to provide any funding, or to transact, purchase or sell or a solicitation of an offer to buy any security or enter into, transfer or assign, or terminate any transaction. The Model may differ substantially from an actionable value, particularly in volatile market conditions.. The Model may vary significantly from models from other sources, such as dealers, pricing services, data vendors, counter-parties, auditors, or other business units of the Group. No representation is made that the values could actually be achieved upon servicing of the notes by Transsec 5 or that such values are in any way indicative of future performance. The Model does not necessarily reflect Standard Bank’s internal bookkeeping or theoretical model-based valuations, and are not tested independently by Standard Bank. Any use of the Model by the Company or a Recipient is entirely at its own risk and no responsibility, duty of care or liability whatsoever (whether in contract or delict or otherwise including, but not limited to, negligence) is or will be accepted by the Group, or our/their representatives, directors, agents, partners, members, employees or consultants.

The information contained in this Model does not purport to be all inclusive or to contain all of the information that the Company may deem material to its decision or use of the Model. The Company and each Recipient should conduct its own independent investigation and analysis based on such information as it deems necessary. In the event that any further information is provided in connection with this Model, such information shall be supplied for the same purpose and on the same terms as this Model. There is no requirement or obligation on the part of Standard Bank to provide such further information.

No member of the Group makes representations as to the actual value which may be received in connection with a transaction nor the legal, tax, regulatory or accounting effects of consummating a transaction. Unless expressly contemplated hereby, the information in this Model does not take into account the effects of a possible transaction or transactions involving an actual or potential change of control, which may have significant Model and other consequences. The members of the Group shall have no liability (whether in contract, delict or otherwise) for any direct, indirect or consequential loss or damage suffered due to reliance being placed on this Model, the information contained herein or the oral presentations referred to, or on any other written or oral communications transmitted by Standard Bank to any recipient during the course of the recipient’s evaluation of the feasibility of a possible transaction or transactions.

The Company and each Recipient acknowledges and understands that: (a) no member of the Group is providing financial, legal, tax, regulatory, accounting or other advice and nothing in this Model or which may otherwise be communicated or done in connection herewith constitutes advice of any sort to the Company; (b) there may be financial, legal, tax, regulatory or accounting risks associated with the proposed transaction and each recipient should receive advice from its advisers with appropriate expertise to assess relevant risks; and (c) the Company should apprise senior management in its organisation regarding such advice and the disclaimers as to these matters contained herein.

Standard Bank does not intend for this Model to be distributed or used in any jurisdiction where such distribution or use would be contrary to law or regulation or where the Group would be subject to any registration requirement with which it has not already complied. Without limiting the generality of the foregoing, neither this Model nor any copy of it nor any statement herein may be taken or transmitted into the US or distributed, directly or indirectly, in the US or to any US person.

The terms of this disclaimer are in addition to (and do not limit or derogate from) any additional non-reliance undertakings which may be applicable to the Model.

The Company and each Recipient acknowledges that: (i) members of the Group may, now and/ or in the future, have other investment and commercial banking, trust and other relationships with the Company and any other recipient and with other persons (together “Other Persons”); (ii) as a result of those other relationships, each member of the Group may receive information about Other Persons that may be relevant to any of them. Despite this, the Group will not be required to disclose such information, or the fact that it is in possession of such information. In addition, no member of the Group will be required to use such information in performing any role; (iii) members of the Group may, now and in the future, have fiduciary or other relationships under which it, or they, may exercise voting power over the securities of various persons; and (iv) each member of the Group may exercise such voting powers, and otherwise perform its functions in connection with such fiduciary or other relationships, without regard to its relationship with the Company or any other Recipient.

By accepting the Model, each of the Company and any other Recipient agrees to be bound by the limitations and principles provided for in this disclaimer.

Appendix

Transsec 5 Priority of payments

Pre-Enforcement

1	Tax
2	Fees due to Security SPV and Owner Trustees
3	Third Party Expenses
4	Senior Servicing Fee, Standby Servicing Fee, Administration Fee and Standby Administration Fee
5	Derivative net settlements and Derivative Termination Amounts
6	Liquidity Facility - interest and expenses
7	Seller claims under the Sale Agreement
8	Class A Notes (not redemptions only interest)
9	Class B Notes (not redemptions only interest) - subject to no Class B IDE
10	Class C Notes (not redemptions only interest) - subject to no Class C IDE
11	Subordinated Servicing Fee if Standby Servicer becomes Servicer
12	Cash Reserve Required Amount (if applicable)
13	Liquidity Facility – principal
14	Revolving Period top-ups
15	Class A1 Note redemptions - if Class A1 (and same Designated Class A Notes) outstanding
16	Note Redemptions - if Class A Notes outstanding
17	Class B Notes (not redemptions only interest) - subject to Class B IDE
18	Note Redemptions - if no Class A Notes outstanding
19	Arrears Reserve Required Amount (if applicable)
20	Class C Notes (not redemptions only interest) - subject to Class C IDE
21	Note Redemptions - if no Class B Notes outstanding
22	Subordinated Servicing Fee
23	Discretionary top-up of Cash Reserve
24	Derivative Termination Amount (counterparty in default)
25	Subordinated Loan (not redemptions)
26	Subordinated Loan redemptions
27	Dividend to Preference Shareholder
28	Permitted Investments

*Post-Enforcement

1	Tax
2	Fees due to Security SPV and Owner Trustees
3	Third Party Expenses
4	Senior Servicing Fee, Standby Servicing Fee, Administration Fee and Standby Administration Fee
5	Derivative net settlements and Derivative Termination Amounts
6	Liquidity Facility – all amounts due and payable, including principal
7	Seller claims under the Sale Agreement
8	Class A Notes (interest and redemptions)
9	Class B Notes (interest and redemptions)
10	Subordinated Servicing Fee (if SATDF is not Servicer) and Class C Notes (interest and redemptions)
11	Derivative Termination Amount (counterparty in default)
12	Subordinated Servicing Fee (if SATDF is Servicer)
13	Subordinated Loan – all amounts due and payable including principal
14	Dividend to Preference Shareholder
15	Dividend to Ordinary Shareholder

*The Post-Enforcement Priority of Payments becomes applicable when the Security SPV has given notice to the Issuer of an ***Event of Default***
